DOWNEY GLASS

DG-100

STORE FRONT DOORS

DG-100 is ideal for expanding the natural light thanks to its significantly compact visible aluminum face width. The system is capable with watertightness performances, which in combination with the high sound reduction make it ideal for the most complex projects.

- Simplicity of use and high functionality
- Flexibility in assembling
- Improved static loads and functionality versus extreme weather conditions
- Ideal in class performances in terms of water tightness and sound reduction
